About Company

2018

Start with Single Product Safety Shoes

2019

First Safety Mall with 1000+ Safety Products under One Roof 4000 Sq.Ft Storage Area.

2020

Added New Innovative Product and Services.

2021

Start Fire Refilling Station & Fire Training and Life Line and Fire Suppression System

2024

Keval Safety Solutions Pvt. Ltd. Around 75000 Sq.Ft. Production Area with more than 200+ PPE Product Manufacturing at Por, Vadodara.

2023

Tigo's Brand Name Launch with Safety Shoes and Safety PPE Products.

2022

Established team and Department with 10,000 Sq.Ft. Area with Own Production in Various PPE

at 2025

Mr. Keval Goti

We aim of providing 360 degree solutions in the field of Industrial safety across the entire spectrum of Fall protection, Fire Protection, Safety Consulting & Trainings as well as an all encompassing range of solutions for Personal Protective Equipment from Head to Toe for every major Industry and department.

Awarded with an ISO 9001: 2008 certification for quality, we have been successfully catering to the safety related requirements of large conglomerates as well as small & medium sized organizations globally with our Competitiveness, Professionalism and Streamlined Management

Our Vision

To be the India's no. 1 provider of innovative solutions in protecting life, environment & property.

Our Mission

To empower customer to secure life, environment, property and business by delivering high quality & innovative protection solutions and knowledge using world class manufacturing.

SAFETY SUIT

An industrial safety suit is a full-body protective garment designed to shield workers from chemical splashes, fire, heat, dust, and mechanical risks. Made from flame-retardant, anti-static, and durable materials like Nomex or PVC-coated fabrics, it ensures high resistance to industrial hazards while offering comfort and flexibility for extended use.

SAFETY HAND GLOVES

MECHANICAL SAFETY HAND GLOVES

Safety hand gloves in mechanical areas protect against cuts, abrasions, punctures, heat, and oil exposure. They should meet EN 388 or ANSI 105 standards and be selected based on task-specific risks like sharp tools or vibration.

ALLUMINIXES GLOVES

HAND SLEEVES

SAFETY HELMET

INDUSTRIAL SAFETY HELMET

Safety helmets in industrial areas protect against head injuries from falling objects, impacts, and electrical hazards. They must comply with IS 2925, EN 397, or ANSI Z89.1 standards and include features like shock absorption, adjustable suspension, and optional ear or face protection attachments

SAFETY MASK

BREATHE SAFE. WORK SAFE

Safety masks for industrial use protect against dust, fumes, gases, vapors, and airborne particles. They should be selected based on the hazard type and comply with standards like NIOSH (N95, N99), EN 149 (FFP1, FFP2, FFP3), or IS 9473, ensuring proper filtration efficiency and fit.

HEARING PROTECTION

QUIET COMFORT IN EVERY SHIFT.

Hearing protection devices shield workers from harmful noise levels in industrial environments. They should comply with standards like EN 352 or ANSI S3.19 and offer appropriate Noise Reduction Rating (NRR) or Single Number Rating (SNR) based on the noise level—common types include earplugs and earmuffs.

HEARING PROTECTION PRODUCT GUIDE

Product Name	Description	Usage/Application
3M Ear Plug	Disposable foam ear plugs with a tapered design for comfort.	Ideal for factories, workshops, noisy areas
Ear Plug Dispenser	Wall-mounted unit for easy dispensing of foam ear plugs.	Common in workplaces for quick access
EP-22	Over-ear protective earmuff with soft padding.	Suitable for industrial uses
Earmuff	Durable hearing protector with adjustable headband.	Used in construction, manufacturing
3M 1270 Reusable Corded Earplug	Reusable, washable earplugs with a connecting cord.	For repeated use in moderate noise areas

SAFETY GOGGLES

Safety goggles protect eyes from dust, chemical splashes, flying particles, and radiation in industrial settings. They must comply with ANSI Z87.1, EN 166, or IS 5983 standards, offer impact resistance, anti-fog/anti-scratch coating, and provide a secure fit for full eye coverage

WHAT IS A FIRE EXTINGUISHER?

			Suitable for Class B and Class C fires but not for Class A
			Suitable for Class A fires but not for Class B or Class C
			Suitable for Class A and Class B fires but not for Class C

- An extinguisher is a First-aid device which is used against the critical situations of fire only. There is no chance for testing the device while fire is going on, that's why the device must be totally reliable and user friendly.
- When it comes to application, Fire equipment needs to be identifiable, handy and appropriate for the property it is intended to protect.
- But good fire protection is about more than just having the right devices in the right places, also requires rigorous monitoring to ensure that it will perform effectively when needed.
- Everyone should be familiar with the picture symbols which identify the types of fires on which they may be used. As listed below.
- The symbol diagonal red slashes indicates a potential danger if the extinguisher is used on that particular type of fire.
- Absence of a type symbol means only that the extinguisher is not recommended as particularly effective for that classification of fire.

FIRE SAFETY

ABC FIRE EXTINGUISHERS

An ABC or Multi-Purpose Dry Chemical portable fire extinguisher is useful for Class A, B and C fires.

CO2 BASED FIRE EXTINGUISHERS

Co2 fire extinguishers contain carbon dioxide in a pressurized liquid form, making them effective on Class B (Flammable Liquids) and Class C (Electrical) Fires.

WATER FOAM FIRE EXTINGUISHER

Foam extinguishers are one of the most common fire extinguisher types.

CLEAN AGENT FIRE EXTINGUISHERS

Designed to extinguish fires quickly and effectively, particularly in areas with sensitive equipment or where residue from other extinguishing agents is undesirable

LITHIUM-ION BATTERY FIRE EXTINGUISHERS

KANEX-AVD Extinguisher is specially designed to tackle lithium-ion battery fires, providing fast and effective protection against dangerous thermal runaway and flame spread.

D TYPE METAL FIRE EXTINGUISHERS

Specialty fire extinguishers are tailored for specific types of fires and are essential for areas like kitchens or industrial settings.

AUTOMATIC MODULAR TYPE FIRE EXTINGUISHERS

Useful for unoccupied rooms or spaces, server room and safety protection in large storage areas.

WATER MIST CUM COMPRESSED AIR FOAM SYSTEM (CAFS)

Kanex CAFS technology Compressed Air Foam Systems are self contained stored-energy fire suppression unit which have added ability to inject compressed air into the foam solution to generate a powerful fire attacking and suppression foam.

KANEX[®]

Kanex Fire Solutions Ltd.

IN-PANEL- TUBE BASED SUPPRESSION SYSTEM (KATS)

Research shows Electrical fires, Server rack fires & Transformer fires consistently rank among the leading causes of commercial and residential fires, most of the fires starts with a just spark in electrical cabinets/panels/enclosures or due to improper handling. This often resulting in big fire then injury, death & significant property loss, costing money and downtime to business. And there is just one way to deal with them, instant detection and swift firefighting.

THE SOLUTION

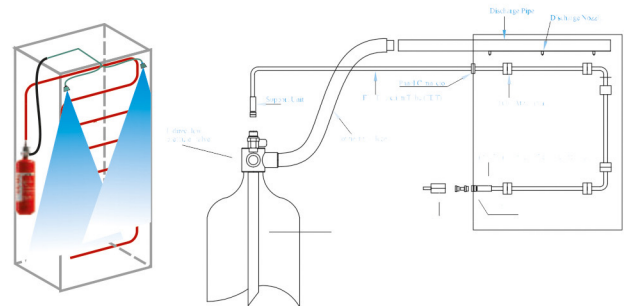

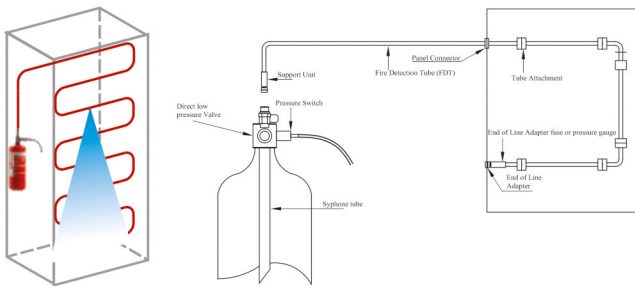

Kanex In-Panel Tube Based Suppression System (KATS) takes fire detection and suppression inside the hazard, quickly catching a growing fire and preventing its spread to other areas that might need firefighters or sprinklers.

The KATS system uses a UL-listed continuous linear sensor tube that reliably detects and actuates the extinguishing agent with pneumatic technology. It is flexible, space-efficient, and cost-effective.

FEATURES

- Self-actuated & No external power source required.
- Suitable for all types of fire viz Class A, B, C & Electrically started Fires
- Clean Agent gas in environment friendly
- Easy to maintain, operational readiness, expansion flexibility. 100% effective
- Available in High pressure (CO2) & Low pressure (Powder, Foam, Clean Agent gas FK-5-1-12 (Novec1230), HFC227ea (FM200), HFC236fa (Fe36)
- 24 x 7 Operation Easy to maintain & Re-installation, Re-filling.

Ideal Use

Electrical Panels

Server Racks

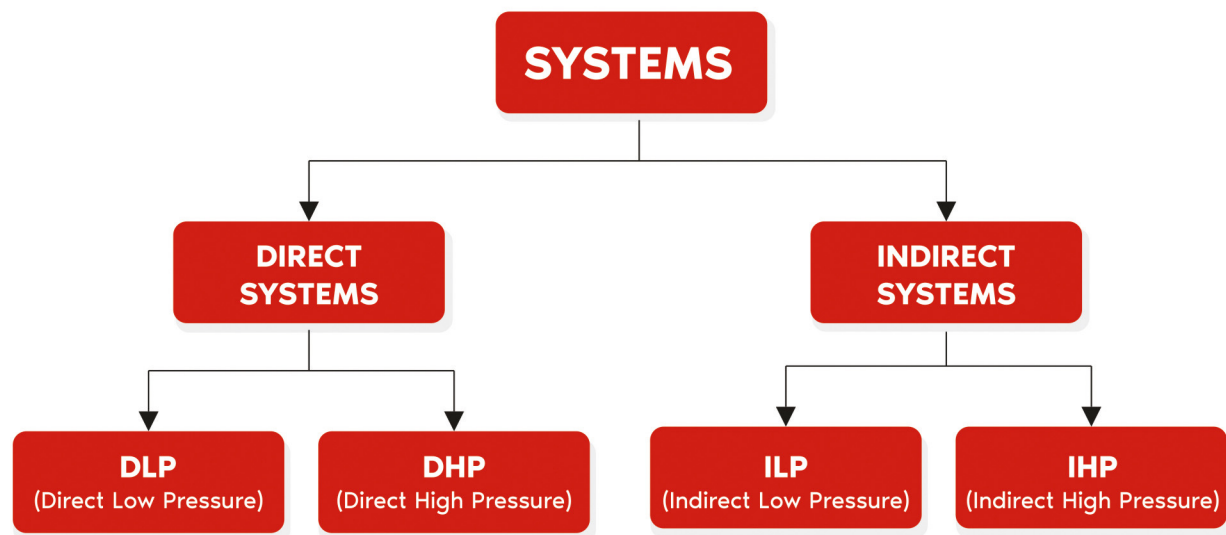

CNC Machine

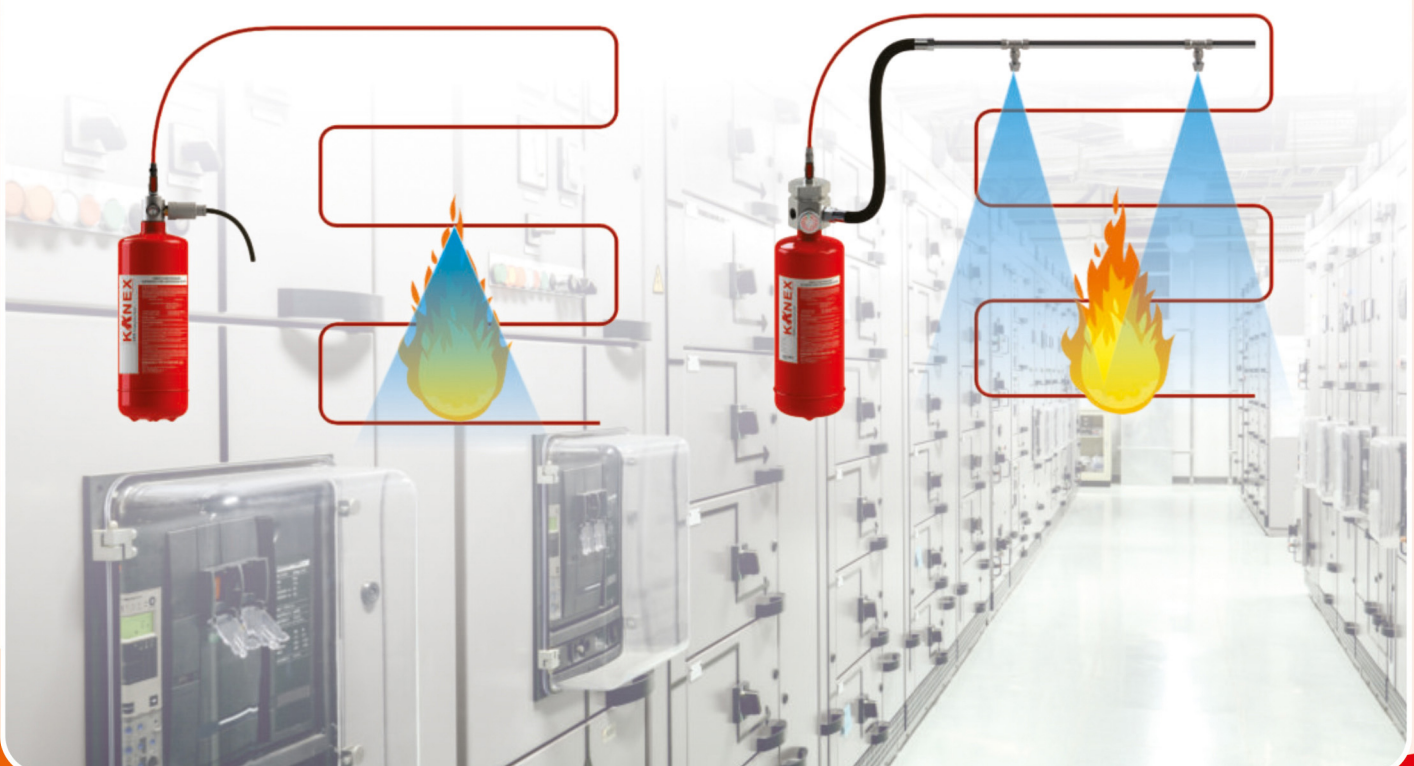

Dry Transformer

CLASSIFICATION

Available in Novec1230 (FK-5-1-12), FM-200 (HFC227ea) FE-36 (HFC236fa) CO2 gas, MAP 90 ABC Powder

- The direct system utilizes Heat Sensing Tube as both fire sensing & suppression of fire by delivering the agent.
- The nearest surface of Heat Sensing Tube bursts due to heating & it forms effective discharge nozzle
- Due to which pressure drops in Heat Sensing Tube & entire content of cylinder discharges.
- The Indirect system utilizes Heat Sensing Tube as fire sensing ONLY Suppression of fire is delivered via copper, SS or Braided pipe.
- The nearest surface of Heat Sensing Tube bursts due to heating it actuates the valve & agent discharges through strategically placed
- nozzles within protected enclosure

DIRECTION

These signs are for means of safety indication of safe measures.

PROHIBITION

These signs are for means of prohibiting the action of different types which will help to avoid accidents.

SAFETY

These signs are for means of safety indication of safe measures.

FIRE EQUIPMENT

These signs are meant for identifying appropriate type of Fire equipments for different type of fire & fire actions.

COMBINATION

These signs are used for combination of different measures like Fire Equipment, Prohibition and Safety.

MANDATORY

These signs are meant for mandatory notices which form an important part in maintenance of the means of escape.

WARNING

These signs are used in conjunction with mandatory and prohibition signs to help create a multipurpose signboard, to aid personnel safety in the workplace.

GENERAL

These signs are means of safety indication of safe measures which are especially used in accommodation areas.

SAFETY EMERGENCY SIREN & BLANKET

YOUR FIRST SIGNAL OF SAFETY.

A safety emergency siren alerts personnel during critical events like fire, gas leaks, or evacuations. It must produce a loud, distinct sound (typically 110-130 dB), be weather-resistant, and operate on mains or battery backup. It should comply with IS/IEC 60204 or NFPA codes for emergency warning systems.

SPILL KITS

Be spill-ready anytime!

With a reliable spill kit, you can control chemical or oil leaks instantly—protecting people, equipment, and the environment. Spill kits are designed to handle unexpected leaks or spills safely.

Spill Kits are essential for all industries as Spilling is common hazard in every industry. Add-on safety has introduced LiquiZorb Spill kits as per set standards.

LiquiZorb is for different types of spills and are available in various capacities from 15 to 360 Litres, they are as follows:

Universal Spill Kits: for the clean-up of non-aggressive or non-hazardous liquid spills. Can be used for all purpose of cleanup activities like Oil, Chemical, Bodily fluid etc.

Oil-Spill Kits, for the clean-up of grease and oil-based liquids.

Chemical Spill Kits, for the clean-up of aggressive or hazardous liquids.

Acid and Alkaline kits, for the clean-up of highly hazardous Acids and Alkaline.

Mercury Spill Kit for the cleanup of hazardous mercury.
